

## PROBLEMS WITH ESA, VOUCHERS, ETC.

1. A string commonly attached to the acceptance of government money for education is requiring the student to submit to government-mandated tests.
2. The family frequently is required to meet each year with a "choice navigator" who monitors the progress of the "tax-funded child."
3. In states, such as Arizona , that have no control of private schools, imposed requirements on parents of government-funded students can "flow through them to the school."
4. Charter schools are government schools!
5. Voucher and school-choice programs are "essentially welfare, promoting government dependence..."

## REMEMBER THIS:

"You can have freedom, or you can accept government handouts. You cannot have both."

Rick Boyer, attorney

ESAs aren't a free market solution, they are a Marxist-lite market manipulation technique."

Robert Bortins, CEO of Classical Conversations

# THE SCHOOL CHOICE TRAP

DECEPTIVE CLAIMS ABOUT  
SCHOOL CHOICE

## IF THE MONEY FOLLOWS THE CHILD:

1. Just 2 decades after Sweden passed school choice, homeschool was banned and a nationalized education system was installed. Similar scenarios occurred in South Africa, Australia and Canada with little to no difference between private and public schools

2. Via Every Student Succeeds Act: "**ALL** education must be aligned to post-secondary readiness" - Betsy Devos

When the money follows the child, so do the mandates.

## YOU HAVE TO BE ACCOUNTABLE WITH PUBLIC TAX DOLLARS

1. Property Taxes (a major source of school funding) are a plank in the Communist Manifesto by Karl Marx
2. Homeschoolers and families attending private schools are still forced to pay property taxes
3. Accountability is a deceitful way to convince others to accept regulation

## DANGERS OF SCHOOL CHOICE: THE REAL AGENDA

1. UNESCO commissioned report premises that the government - **NOT THE PARENTS** - is primarily responsible for the education of children. UN Sustainable Development Goal #4 claims the State remains the duty bearer of education as a public good.

**\*\*Hidden agenda: Children belong to the state (not their families) to be trained to obey and serve the state**

2. Private schools are set to become the same as public schools. "Every place a student learns is ultimately of benefit to the public, all education should be considered 'public education'. - Betsy Devos

**Hidden agenda: All forms of education, including homeschooling, are to be controlled**
